

## My Impression about CAMPUS Asia in Sungkyunkwan University

I was happy to take part in this programs. This program is very great and wonderful program, in particularly interaction Chinese students and Korean students. Students can contact between Japanese, Korean and Chinese students. Students can understand the way of thinking or opinions or favorite things. Students can also find your English skills. In my case, I could not speak English than I have thought , and I didn't know my country than I have thought.

In additional , it was fun time for me to experience the Korean food ,building, and landscaping, in particularly soul N-tower. It was very nice night view from top of the N-tower . then, I felt that it was good for me to go to the N-tower. Moreover, I strengthened your mentality, and I was glad to make a friends with each other, so I think this program is very good.

But I regretted that students in Korean had a little interaction. Because the Korean students were enjoying the summer vacation. And I wanted Korean students to guide the soul city, and teach Korean language. In my cases , when I go abroad, I grow up in anytime and anywhere. So, I would like to go abroad from now on, too.

Finally, thank you for taking part in this programs. I hope that this programs continue from now on .
